Urbo.

The Urbo Series of door and window hardware offers clean shapes with a stylish combination of square and radiused edges.

A fineness of line offers a lighter look than Miro or Icon but with no compromise on strength or performance. Urbo is a powdercoated hardware option.

Urbo hardware is designed for aluminium windows and doors, as well as for internal timber doors.

The Urbo Range

Urbo Lever Door Handle

A compact design with fine lines and a chunky escutcheon to give hinged doors the ideal finishing touch. Snib or key operation is available. The Urbo Lever Door Handle offers multi-point locking, and when the handle is lifted upwards it activates locking rods at the top and bottom of the door for added security.

Urbo Pull Handle

A comfortable grip for smooth door movement, this sliding door pull handle continues the attractive Urbo aesthetics. Inner edges are smoothly radiused. Lock is fixed separately to the door and is activated by a key or interior turn knob. And four-point locking system is available. A large version of the Urbo Pull Handle is available for a slider in any series. Apex or Windsor turn sets are compatible with this pull handle.

Urbo Bi-Fold Operator

The Urbo bi-fold operator is a sleek swivel lock that activates locking rods in the top and bottom of the door or window panel.

Urbo Flush Pull

Continuing the blend of contoured and square edges, the Urbo flush pull is ideal for lighter sliding panels where robust hand grip is not required. The lock is mounted separately from the pull and is operated by key or snib.

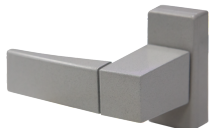

Urbo Surface Mount Sliding Handle

The Urbo surface mount sliding handle has a all-in-one handle and lock for sliding doors or windows. Snib or keyway installed into the body of the handle.

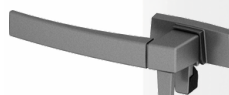

Urbo Architectural Window Fastener

The Urbo Architectural Window Fastener consists of a separately fixed wedge and fastener at top that is suitable for APL Architectural Series.

Urbo Half Lever

The Urbo half lever is a small lever handle that locks sliding door panels together— usually in 4-panel configurations. The Urbo half lever may be used in conjunction with a pull handle on heavier doors. A self-latching option is available.

Urbo Venting Window Fastener

The Urbo Venting Window Fastener combines refinement and functionality with slim lines. The handle is suitable for residential window suites, including ThermalHEART. A venting option is available which allows the window to be fastened in a partially open position for passive ventilation.

Urbo Window Fastener

Closes against the window frame with no visible flap or wedge. Available in a low profile option.

Urbo Espagnolette

The Urbo espagnolette offers single hand, two-point locking (no closing wedge). A secure venting option is also available.
